

USER MANUAL

Western Product

INSTALLATION:

Place the device about 5cm behind the wall and 10cm from the sides.

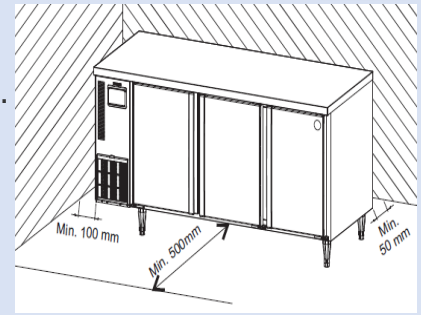

Install on a stable, stable surface.

Peel off all the protective film.

Do not plug in the power for 2 hours.

Do not install the refrigerator near gas tanks.

After 2 hours, plug in the power and do not store food in the cupboard for 8 hours.

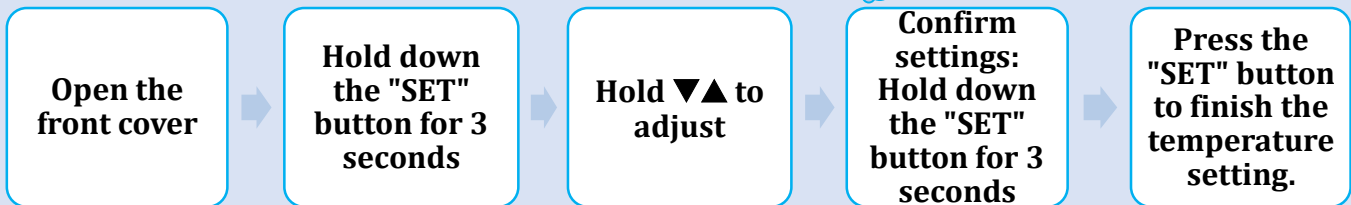

TEMPERATURE SETTINGS:

Chiller:
-2 to 12°C

Freezer:
-23 to -7°C

Every 4-5 hours the device will automatically defrost 1 time in about 30 minutes, during defrosting the screen display flashes will show:

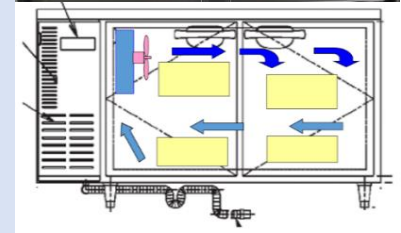

ARRANGEMENT OF FOODS:

Do not line up higher than the "red line". Arrange goods neatly and neatly to ensure the circulation of cold air inside the cabinet.

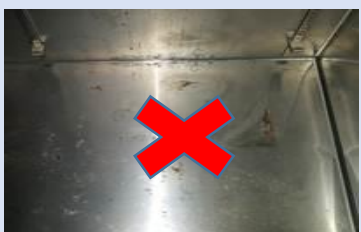

Do not put food too cramped inside the refrigerator, as it is now a bit too cold to find loopholes to circulate inside the cabinet, resulting in poor refrigeration and users mistaking the refrigerator for errors.

Cabinets designed for cold storage and freezing purposes only. It is not intended to freeze the product.

CLEANING:

Use a clean, damp cloth to wipe the surface of the device daily.

① Turn off the power.

④ Open the control panel, take the air filter -> Clean the air filter.

② Remove the shelf tray, clean inside the device.

③ Clean the door and rubber gaskets.
